Art Unit: 1732

DETAILED ACTION

1. Applicant's election with traverse of claims 20-22 and 34-36 in Paper No. 5 is acknowledged. The traversal is on the ground(s) that the term "relative to" indicates movement of either the port or panel. This is not found persuasive because the claims 20-22 and 34-36 clearly disclose that the extrusion port is fixed and the panel is rotated, whereas claims 9-11 and 24-27 clearly disclose moving the port relative to the panel. The term "relative to" indicates that the *movement of the port* is related to the panel.

The requirement is still deemed proper and is therefore made FINAL.

- 2. Claims 9-11 and 24-27 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in Paper No. 5.
- 3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 4. Claims 8,12,15,16,17,23,28,29,30,31, and 37 are rejected under 35 U.S.C. 102(e) as being anticipated by Kunert et al (USPN 5057265). Kunert et al teach the claimed process as evident by col 2, In 1-col 10, In 23 and figs 2-6.

Application/Control Number: 09/764,105

Art Unit: 1732

- 5. Claims 20-21 and 34-35 are rejected under 35 U.S.C. 102(b) as being anticipated by Chenel et al (USPN 4120999). Chenel et al teach the claimed process as evident by col 4, In 65-67 and figs 1-8.
- 6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 7. Claim 22 is rejected under 35 U.S.C. 103(a) as being unpatentable over Chenel et al (USPN 4120999) in view of Kunert et al (USPN 5057265). The above teachings of Chenel et al are incorporated hereinafter. Chenel et al does not teach inserting the edge of the panel into the port. Kunert et al teach extruding a frame onto a panel (col 2, ln 1-col 10, ln 23 and figs 2-6); and inserting the panel into an extrusion port during the extrusion molding step (col 2, ln 1-col 10, ln 23 and figs 2-6). Chenel et al and Kunert et al are combinable because they are analogous with respect to extrusion molding a frame onto a panel. Thus, it would have been obvious to one of ordinary skill in the art at the time the invention was made to use the extrusion port of Kunert et al in the process of Chenel et al in order to precisely extrusion mold a frame.
- 8. Claim 36 is rejected under 35 U.S.C. 103(a) as being unpatentable over Chenel et al (USPN 4120999) in view of Kunert et al (USPN 5057265). The above teachings of Chenel et al are incorporated hereinafter. Chenel et al does not teach inserting the edge of the panel into the port. Kunert et al teach extruding a frame onto a panel (col 2,

Page 4

In 1-col 10, In 23 and figs 2-6); and inserting the panel into an extrusion port during the extrusion molding step (col 2, In 1-col 10, In 23 and figs 2-6). Chenel et al and Kunert et al are combinable because they are analogous with respect to extrusion molding a frame onto a panel. Thus, it would have been obvious to one of ordinary skill in the art at the time the invention was made to use the extrusion port of Kunert et al in the process of Chenel et al in order to precisely extrusion mold a frame.

- 9. Claims 13,14,18,19,32 and 33 are allowed.
- 10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to EDMUND H. LEE whose telephone number is 703.305.4019. The examiner can normally be reached on MONDAY-THURSDAY FROM 9AM-4PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Colaianni can be reached on 703.305.5493. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703.308.0661.
